TECHNICIEN SUPERIEUR (H/F) EN FORMULATION /

FORMULATION SENIOR TECHNICIAN (M/F)

Baugy - France

ERBC est à la recherche d'un technicien supérieur (H/F) en formulation pour son site de Baugy, près de Bourges (France).

En tant que technicien (H/F) en formulation, vous serez responsable de la réalisation des gestes techniques de la préparation des formulations d'élément d'essai et de véhicule pour les études, en fonction du plan d'étude, des procédures internes, des Bonnes Pratiques de Laboratoire, des recommandations du directeur d'étude/coordonateur d'étude, tout en respectant les règles de sécurité. Vous pourrez également être amené à faire des essais de solubilité, des déterminations de densité et les prélèvements (échantillonnage) sous la supervision du directeur d'études. En tant que technicien supérieur, vous serez responsable de l'organisation de votre semaine de travail en fonction des préparations de formulations à réaliser pour chaque étude et de la gestion des éléments d'essais et des réactifs de votre zone de travail.

Vous serez également responsable de la création, tenue et finalisation des données brutes concernant les préparations des formulations et le suivi de la consommation de l'élément d'essai, de manière à assurer la qualité des données produites. Vous devrez travailler en toute transparence avec le directeur d'étude et le coordinateur de l'étude et maintenir un climat de confiance avec l'assurance qualité. Vous devrez également maintenir votre zone de travail propre et rangée.

/

ERBC is looking for a formulation senior technician at its Baugy site, near Bourges (France).

As a formulation technician (M/F), you will be responsible to carry out all procedures of test item and vehicle formulation preparation, as requested by the study plan, company Standard Operating Procedures (SOPs), applicable Good Laboratory Practice regulations, and according to the Study Director and the study coordinator recommendations, while respecting safety rules. You will also participate to solubility assay, density determination and sampling, under the supervision of the Study Director. As a senior technician, you will be responsible of your weekly work organisation, according to the formulation preparation to be done for each study, and you will manage the test item and reagents of your area.

You will also be responsible to create, maintain and finalize raw data regarding

Qualification:

- Si possible, expérience d'au moins 3 ans en tant que technicien en formulation. / If possible, at least three years of experience as a formulation technician
- Si possible, expérience dans un environnement de travail suivant un référentiel qualité (tels que BPL, ISO ...) et des procédures internes. / In possible, experience in working in an environment with high quality standards (such as GLP, ISO...) and established testing facility operations and procedures.

Diplôme / Education:

- IUT, BTS ou licence, dans le domaine de la chimie/galénique / in the chemistry or galenic domain

Compétences / Skills:

- Capacité de travail en équipe, d'organisation, d'autonomie et de rigueur. / Teamwork, organisation, autonomy and rigor skills.
- Compétence en logiciels informatiques. / Computer software skills.
- Ce poste nécessite d'être capable de lire des documents en anglais. / This position requires ability to read English.

Localisation / Location:

Baugy – France

About ERBC Group

European Research Biology Center (ERBC) is a European CRO, leader in non-clinical studies. The company offers to healthcare and chemical professionals a comprehensive range of experimental capabilities, preclinical models, regulatory pre-IND package and consultancy services to de-risk innovation and improve R&D productivity.

Based in Baugy (France) and Pomezia/Roma (Italy), ERBC provides all services from preclinical proof-of-concept to market of any type of drug candidate or chemical compound. Each project is managed by a study director, relying on a multi-disciplinary team of experts (240 FTE), notably in general pharmacology, cardiology, electrophysiology and pathophysiology, also leveraging on a world class academic and private network.

ERBC is deeply engaged in animal ethics and welfare. ERBC supports the Basel Declaration, respects the 3Rs concept and continually improves its tools and procedures to maximize the balance between the benefit for health and the animal well-being.
