
UCLouvain is a comprehensive university with a wide-ranging presence across multiple sites, providing extensive prospects for a varied pedagogical engagement and fostering ambitious, cross-disciplinary research initiatives. The UCLouvain **Health Science Sector** is organized around four faculties, five dedicated research institutes, and the Cliniques universitaires Saint-Luc academic hospital, strategically positioned in the southern vicinity of Brussels (Belgium).

The UCLouvain **Faculty of Public Health** and **Institute of Experimental and Clinical Research (IREC)** are inviting applications for a position of:

Full Professor in Health, Toxicology and Environment (permanent position, starting date September 2024).

Main missions

The successful candidate will develop an advanced, cross-disciplinary research program within the field of toxicology applied to environmental health, with a specific emphasis on elucidating the impacts of chemical environmental contamination on human health. The applicant will engage in collaborative efforts to fortify and broaden the research teams within the Louvain Centre for Toxicology and Applied Pharmacology (LTAP), situated in the research facilities of IREC.

The prospective appointee will be entrusted with pedagogical responsibilities in the domains of environmental health and toxicology, or at their interdisciplinary nexus. These responsibilities encompass teaching duties spanning both undergraduate and postgraduate levels, in addition to the supervision of master's and doctoral theses. The role entails assuming administrative and organizational responsibilities within the Faculties.

Qualifications

Applicants should possess a **MD, MD-PhD, or PhD** in medical, pharmaceutical, biomedical sciences, public health, or a closely related field that is pertinent to the position. The candidate should also have the ability to showcase exceptional scientific leadership skills, and the capability to collaborate effectively within an established team of professors and researchers is considered an additional advantage.

Our HR policy supports equal opportunities and diversity including in the academic career. Attention is also paid to reconciliation of private life and professional life.
