

IUTOX Risk Assessment Summer School (RASS)

Co-Sponsored by EUROTOX

Organized by the Turkish Society of Toxicology (TTD)

May 23-27, 2022 | Istanbul, Turkey

Organized by the International Union of Toxicology (IUTOX), in collaboration with the Federation of European Toxicologists and European Societies of Toxicology (EUROTOX) under the auspices of Turkish Society of Toxicology (TTD)

Course Description:

1. General principles and quantitative approaches of risk assessment; hazard and exposure characterization
2. Risk communication, risk perception and risk benefit analysis of chemicals
3. New approaches in risk assessment of chemicals
4. Risk assessment of chemicals with case studies
5. Worldwide approaches and regulatory requirements of risk assessment
6. Safety evaluation of medical products and food additives
7. Safety evaluation of chemicals and drugs regarding their liver toxicity
8. Globally harmonized system for classification of highly hazardous substances for risk prioritization
9. Skin sensitization using 3R methodologies, quantitative risk assessment and safety assessment of cosmetics

This is a five-day course, with nine two-hour lectures and ten working group sessions. A written exam will be held at the end of the course. All sessions presented will be in English.

Fees:

The attendance fee for all participants is 150 USD (250 USD for companies), which covers registration and full board and accommodations (breakfast, lunch, dinner). Participants are responsible for their own transportation.

Selection Criteria for Participation:

All registrants must show proof of full vaccination to participate.

1. Work and experience in toxicology related areas
2. Reference letters from employer or university professor
3. Geographic distribution and representation
4. Gender distribution
5. English proficiency
6. Ability to pay the 150USD fee and transportation
